### FOREWORD FROM THE MINISTER

It is my pleasure to present the Corporate Plan (CP) for the Ministry of Lands and Natural Resources for 2019/2020 – 2021/2022.

This CP sets out the Ministry's strategic direction over the next three years within the broader context of the Tonga Strategic Development Framework II (2015-2025) / TSDF II and the Kingdom's development initiatives.

The emphasis of the CP is to enhance the Ministry's service delivery through operational and functional improvements. The Plan is instrumental in guiding the Ministry's ongoing activities and implementation of new initiatives. The Ministry is committed to harnessing the opportunities that are available through Information Communication and Technology (ICT) that will enable the Ministry to be responsive, transparent and accountable in its decision-making and its service delivery.

I am therefore encouraged with Government's Budget Strategy 2019/2020: Priority No. 9 (Land Administration and Management Reform), which is an indication of Government's commitment to the Kingdom's land and natural resources.

I trust that with the leadership of the Chief Executive Officer (Ms. Rosamond C. Bing), the executive team and the Ministry's personnel, the strategies and outcomes outlined in this CP will be achieved with a prudent approach to financial expenditure and resource allocation.

I encourage our working partners to continue with their support and collaboration to the Ministry as we strive to achieve our goals in the next three years.

Minister for Lands and Natural Resources National Spatial Planning Authority

# **MESSAGE FROM THE CHIEF EXECUTIVE OFFICER**

The MLNR is honored to present its Revised CP for the FY 2019/2020 - 2021/2022.

The Plan forges ahead with addressing those gaps that continue to challenge the Ministry's administrative and operational capabilities. The Ministry, through the commitment of its Executive team, has adopted the vision of the Ministry to -

Promote sustainable use and access to the Kingdom's lands and natural resources to generate social, economic and environmental benefits for the people of Tonga.

The Ministry and its personnel are committed to the following corporate goals -

- Focusing on prudent and efficient management of the Ministry's resources
- Demonstrating their commitment to the implementation of this Corporate Plan
- Making decisions that are evidence-based, transparent and accountable

• Focusing on achievements and success based on partnership, stakeholder collaboration and meaningful and respectful community engagement.

This Plan also reflects the aspirations of the Ministry which are to be directed by Strategic Themes:

- a. Economic Efficiency
- b. Client and Stakeholder Benefits
- c. Trusted sources of information and data
- d. Sustainable business
- e. Regulatory framework
- f. Sustainable management of resources
- g. Responsible use of seabed minerals and aggregates
- h. Strengthen resilience to natural events
- i. Organizational performance and capacity.

These strategies are, in turn, supported by the Ministry's activities and deliverables. These are described in the Ministry's Results Map.

The Ministry has also re-aligned its contribution to implementing the TSDF II (2015 – 2025) by incorporating to the Plan the use of information technology as a key tool to achieving the Ministry's goals. In this regard, the Ministry welcomes the Government's commitment of resourcing under Priority No. 9 (Land Administration and Management Reform). The Ministry is also encouraged by the endorsement of the Digital Government Strategic Framework (2019-2024) as an instrumental platform for implementation of this priority.

I wish to express my sincere gratitude to the Deputy Chief Executive Officers ('Akanete Lauti, Fetu'u Vea, Seli Taufa and Taaniela Kula) and our Executive Group for their tireless efforts and valued contribution to the formulation of this revised CP.

ROSAMOND C. BING Chief Executive Officer

# **CORPORATE PLAN EXECUTIVE SUMMARY**

#### MLNR Vision and Strategic Themes

The Ministry's vision is to promote sustainable use and access to the Kingdom's land and natural resources to generate social, economic, and environmental benefits for the people of Tonga.

#### **Strategic Themes:**

The Ministry had adopted a new approach to the development of this CP in which the Ministry is to be directed by nine (9) Strategic Themes and Outcomes:

#### Strategic Theme 1: Economic Efficiency

- 1.1 Minimize costs and barriers to enable seamless business transactions for government, stakeholders and the community by setting up electronic service delivery
- 1.2 Reduce the cost of property transactions by facilitating the implementation of electronic conveyancing and plan processing
- 1.3 Support efficient integration of our fundamental data anytime, anywhere on any device through open access via web services
- 1.4 Support industry innovation and minimize duplication of effort by providing open access to fit for purpose data and systems

#### Strategic Theme 2: Client and Stakeholder Benefits

- 2.1 Understand and meet the needs of our clients and stakeholders through enhanced interaction and collaboration and fit for purpose, cost effective services
- 2.2 Increase demand for our land information by meeting the needs for simple and flexible web based services that integrate with existing and new applications and technologies through timely services and accurate data and seamless integration and interoperability.
- 2.3 Ensure government, industry and the community can rely on our services by providing a robust and stable technology platform
- 2.4 Minimize volatility and maximize predictability for land owners and government by improving the quality of valuations for rating and taxing purposes:

#### Strategic Theme 3: Trusted Source of Knowledge and Information.

- 3.1 Provide a central point of truth for land and property information by integrating data, services and systems from internal and external sources
- 3.2 Minimize duplication and maximize interoperability by promoting a single cadastre including a layer of proposed developments
- 3.3 Support timely and effective emergency responses with reliable and accurate mapping, imagery and addressing information and services
- 3.4 Build confidence in the land administration system by promoting and supporting the integrity and authority of the roles of the Registrar General and Surveyor General.

#### Strategic Theme 4: Sustainable Business

- 4.1 Provide appropriate returns to the Government and ensure the Ministry's continuing viability by efficiently managing resources and expenditure to match fluctuating service demand.
- 4.2 Build the confidence of our stakeholders by promoting a robust and transparent governance processes.

- 4.3 Realign our structures and support staff to implement our new business model.
- 4.4 Provide certainty, constancy and performance for clients, stakeholders and staff through a period of change.
- 4.5 Ensure the Ministry is ready for the challenges of the future by boosting the skills and qualifications of our staff through our Workforce Development Plan
- 4.6 Engaged and effective workforce
- 4.7 Reputation for quality and reliability
- 4.8 Robust and transparent model for fees and charges
- 4.9 Clear mandate for our role

#### Strategic Theme 5: Regulatory Framework

- 5.1 Enforcement of Laws, policies and regulations that outline the legal requirements to render the mandate of the Ministry
- 5.2 Compliance with complementary policies, standards, directives and guidelines to ensure that the mandate of the Ministry is properly administered.

#### Strategic Theme 6: Sustainable Management of Natural Resources

- 6.1 Develop a framework for the sustainable management of coastal areas
- 6.2 Develop a framework for sustainably manage our water resources
- 6.3 Develop a framework for marine scientific research
- 6.4 Optimize the productivity of land in Tonga
- 6.5 Promote and enhance linkages with the National Spatial Planning Authority and contribute to the administration of the National Spatial Planning and Management Act 2012.

#### Strategic Theme 7: Responsible use of our seabed minerals and aggregates

- 7.1 Provide international standard geological scientific services and advice
- 7.2 Plan for a strong, internationally competitive seabed minerals sector
- 7.3 Ensure a responsible resource sector is a valued and valuable contributor to Tonga

#### Strategic Theme 8: Improve resilience to natural events

- 8.1 Leading change and coordinating effort
- 8.2 Understanding risks
- 8.3 Communicating with and educating people about risks
- 8.4 Partnering with those who effect change
- 8.5 Empowering individuals and communities to exercise choice and take responsibility
- 8.6 Reducing risks in the built environment
- 8.7 Supporting capabilities for disaster resilience

#### Strategic Theme 9: Organizational Performance

- 9.1 Keep our staff motivated and promote organizational coherence
- 9.2 Responsive and integrated service delivery
- 9.3 Support our staffs' career development
- 9.4 Value our staff's contribution
- 9.5 Embrace and support diversity
- 9.6 Ensure consultation is central to our policy, program and service decisions
- 9.7 Clear mandate for our role

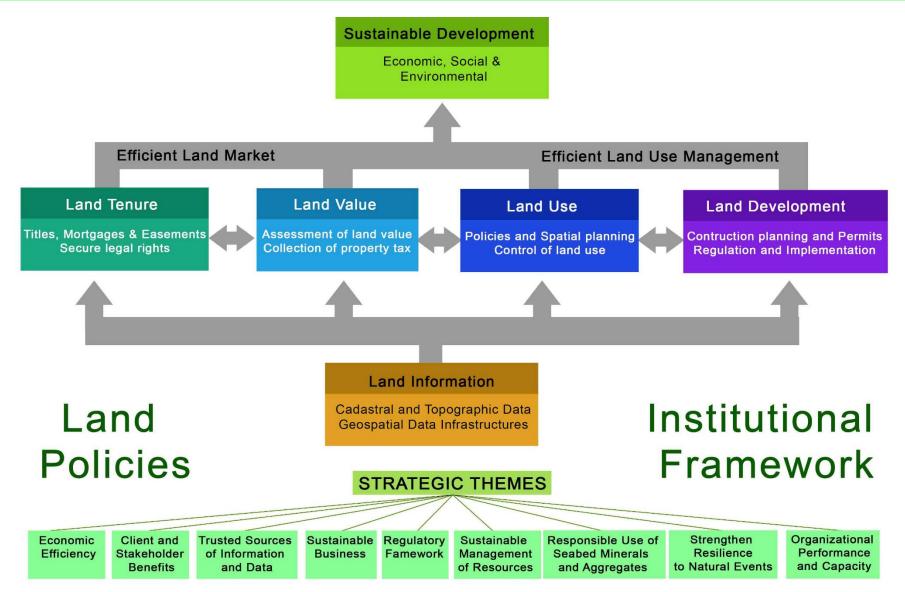

# MANDATE

The MLNR's instruction is also guided by its commitments to the National Agenda (TSDF II), relevant established policies, and international conventions inclusive of the 2030 Global Agenda.

The functions of the Ministry in this CP are to:

- a. Administer all matters concerning the lands of the Kingdom of Tonga under the Tongan Constitution and Land Act;
- b. Ensure that the laws of the Kingdom of Tonga relating to the management and protection of lands and natural resources are implemented, enforced and reviewed, in accordance with national and international obligations to global conventions and laws;
- c. Prepare plans, policies and legislations to ensure efficient service delivery to the people and effectively carry out the monitoring of impacts on the lands, and natural resources and devise protection measures;
- d. Advise Government in relation to matters of lands, natural resources and the protection and conservation of natural resources and the promotion of sustainable development;
- e. Liaise with other Government departments and agencies in relation to issues affecting the lands, natural resources, climate change and environment and assist in meeting their obligations related to the protection of the land rights and the sustainable development of natural resources of the Kingdom of Tonga consistent with objects of relevant Acts;
- f. Facilitate, conduct and participate in scientific research on matters of cultural and economic values of lands and natural resources; and
- g. Facilitate participation of the public and non-government organizations in the protections of lands and natural resources in the Kingdom of Tonga.

## **INTER-RELATIONSHIPS BETWEEN THE DIFFERENT FUNCTIONS OF THE MINISTRY**

# **KEY LEGISLATIONS, POLICIES AND PLANS**

The MLNR's mandate is governed by the Constitution of Tonga, Land Act, relevant Laws and Regulations and other general instructions that direct the Ministry's strategic obligations and stakeholder's expectations of the Ministry. These are administered by the Ministry through its engagement with its stakeholders. They include His Majesty and Privy Council, Cabinet, Legislative Assembly, Judiciary, Nobles and Estate Holders, Ministries / Departments/ Agencies (MDAs), public enterprises private sectors, development partners and the public.

The Ministry's mandate is premised fundamentally on the Act of the Constitution of Tonga and the Land Act and directed by a raft of legislation.

#### 1) Act of the Constitution of Tonga

- 2) Land Act
  - . Declaration of cemeteries
  - . Land (Occupation of Aliens) Regulations
  - . Land (Quarry) Regulations
  - . Land (Removal of Sand) Regulations
  - . Land (Timber) Regulations
  - . Land Court Rules 1991
- 3) Minerals Act
- 4) Maritime Zones Act
- 5) Petroleum Mining Act
  - a. Petroleum Mining Regulations
- 6) Royal Estates Act
- 7) Roads Act

a. Proclamations by the Minister of Lands, Proclaiming Public Roads (include Road closures)

- 8) Parks and Reserves Act
  - a. Parks and Reserves Declaration
- 9) Deep Sea Mineral Act 2016
- 10) National Spatial Planning and Management Act
- 11) Public Finance Management Act Regulations and Treasury Regulations
- 12) Public Services Act Regulations and Treasury Instructions
- 13) Water Resources Management Bill 2016

The following documents also direct the Ministry's mandate -

- 1) First Interim Report of the Royal Land Commission 2008
- 2) Open Solutions for Land Administration (SOLA) Implementation Plan 2015
- 3) Exit Report: SOLA Applications Development (ILAMS/MLNR/Tim Gunson) November 2018
- 4) Integrated Geospatial Information Framework (A Strategic Guide to Develop and Strengthen National Geospatial Information Management) 2018
- 5) UNGGIM Expert Group on Land Administration and Management (Terms of Reference)
- 6) UNGGIM Expert Group on Legal and Policy Frameworks (Terms of Reference)
- 7) UNGGIM Expert Group on Marine Spatial Planning (Terms of Reference)
- 8) Pacific Geospatial and Surveyors Council Strategic Plan (2018-2023)
- 9) Digital Government Strategic Framework (2019-2024)
- 10) Tonga Climate Change Policy 2016
- 11) Joint National Action Plan 2: Climate Change and Disaster Risk Management (2018-2028)
- 12) Stewardship Plan: Fanga'uta Lagoon 2018
- 13) Draft National Land Use Policy 2014
- 14) Tonga National Infrastructure Investment Plan II (2013-2023)

- 15) Draft Nuku'alofa Flood Management Master Plan (2019-2029)
- 16) Cabinet Directions for Reclamation of Space for Market Space
- 17) Cabinet Directions for Study of Development Options within the Fanga'uta Lagoon.
- 18) Spatial Planning Act 2012 (enforced July 2017)
- 19) SAMOA Pathway (SIDs Accelerated Modalities of Action)
- 20) Framework for Pacific Regionalism (FPR) 2014/ A Vision (not a plan of action or an Agenda for Action)
- 21) SENDAI Framework for Disaster Risk Reduction 2015 2030
- 22) United Nations Ocean Conference: Call for Action 2017

# **STAKEHOLDERS**

MLNR engages with a range of stakeholders as are listed in Table 1 below.

Table 1: MLNR stakeholders and how they relate to the Ministry

Stakeholder	Customer Of MLNR	Supplier to MLNR	Partner with MLNR	Oversight of MLNR
His Majesty	X	Х		X
Privy Council	X	X		X
Cabinet	X	X	X	
Legislative Assembly	X	X		X
Judiciary	X			X
Government Ministries	X	X	X	X
Oversight Statutory Entities	X	X		X
Public Enterprises	X	X	X	
Businesses	X	X	X	X
Nobles and Estate Holders	X	X		X
Landholders	X	X		X
Licensees	X	X	X	
General Public	X	X		X
Development Partners	X	X	X	X

# **GAP ANALYSIS**

The Ministry continues to be confronted with the same challenges that have prevailed over the past years. This CP intends to address the gaps and challenges:

#### 3.1 Direction

- a. The need to re-align the overarching management and administration approach of the Ministry to a business model to reflect its service delivery and advisory mandate
- b. Institutional inefficiencies in certain areas

#### 3.2 Governance

- a. Manual processes are inadequate for effective and efficient land administration
- b. Duplication of certain functions and tasks so that systems and procedures need to be streamlined.
- c. Fragmentation of certain systems and procedures requiring integration
- d. Gaps in legal and policy framework survey legislation (best practices and international standards). Seabed Minerals Regulations (licensing regime and fiscal regime), ICT policy, land use policy, sand mining and limestone quarrying regulations, fees and charges regulations, and dredging and reclamation
- e. Aligning land use planning with land administration and land information
- f. Absence of a centralized legal, policy and planning section to consolidate the Ministry's strategic directives
- g. Weak coordination between the Ministry and the Urban Planning and Management Agency
- h. The inadequate provision of services in the land sector
- i. Review of the Royal Land Commission Report and its recommendations

#### 3.3 Compliance

- a. Lack of capacity to address compliance issues
- b. Lack of resources to execute enforcement measures
- c. The capacity to monitor natural resource use is severely inadequate
- d. Need to establish professional and technical standards to ensure compliance with appropriate standards

#### 3.4 Operations

- a. Need to engage professional technical and managerial personnel to close the gap in personnel skills, expertise and experience
- b. The office and working environment and storage infrastructure is wholly inadequate compounded by inferior facilities for customer service
- c. A number of key operational areas are not in place such as records keeping and file management, intra-Ministry networks and communications and implementation of the Open Solutions for Land Administration (SOLA), is protracted and needs to be accelerated
- d. The backlog of assignments identified by the Royal Land Commission in 2009 has been reduced markedly but there remains a sizeable level in backlogs that requires a coordinated effort.

#### 3.5 Stakeholders

- a. Need to strengthen coordination and collaboration with Government and Non-Government stakeholders particularly with the demands from project-related activities and tasks
- b. Need to strengthen engagements with stakeholders through accessibility to the Ministry, its services and products and its personnel.

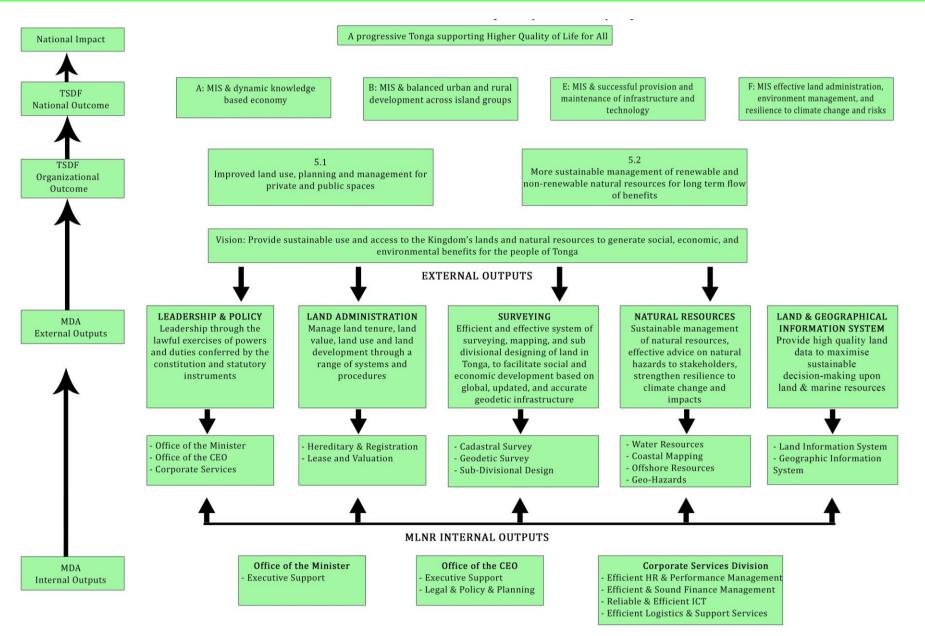

#### 3.6 Finance

- a. The Ministry's revenue stream must be sustainable through the rigorous collection of annual lease rental arrears, seabed minerals exploration licenses, sand –mining royalties and the hiring out of the heavy-duty machinery
- b. The fees and charges prescribed by the Land Act was last updated in 1991. These are not costeffective as the operational costs has increased significantly over the years but the Ministry has not reviewed its fees and charges to reflect the increases in the costs of doing business.

#### 3.7 People

- a. The Ministry's customer service needs significant improvement with adequate office facilities being an essential means to address this
- b. The need to further develop and maintain a robust outreach program and public awareness nationally and internationally (to accommodate the Tongan landholders who reside overseas)

#### **MINISTRY'S RESULT MAP**

#### Sustainable Development Goals (SDGs)/ Regional Frameworks

Land is fundamental for the SDG's, with at least 8 out the 17 SDG's relating to Land Management, Land Policy and Cadaster. These are summarized as follows:

SDG	Relevance
- SDG 1 End poverty	Formalize land ownership
- SDG 2 End hunger	Access to land and protected land tenure rights
- SDG 5 Gender equality	The right for women to own land and secure tenure rights for women
<ul> <li>SDG 10 Reduce inequality within and among countries</li> </ul>	Access to land and protection of tenure rights against discrimination
- SDG 11 Cities safe and sustainable	Protection and recognition of tenure rights for informal urban settlements
- SDG 13 Combat climate change	Land Management, Land planning and spatial planning to reduce emission
<ul> <li>SDG 15 Sustainable ecosystems, forests, land degradation</li> </ul>	Proper management of forest land and sustainable land use
<ul> <li>SDG 16 Peaceful societies justice for all</li> </ul>	Equal access to tenure rights, land policy and land management
- SDG 17 Partnerships	A key factor in achieving the SDG's

The functions and operations of the Ministry of Lands and Natural Resources is consistent with the SDGs & Regional Frameworks Targets and Indicators. The SDG activities and outcomes are articulated and achieved at the Divisional level. MLNR supports the SDGs Targets and Indicators through its alignment to four (4) National Outcomes. At the Ministerial Level, it aligns to the Global Agenda through its nine (9) Strategic Themes. They are: Organizational Performance, Economic Efficiency, Client and Stakeholder Benefits, Trusted Source of Knowledge and Information, Sustainable Business, Regulatory Framework, Sustainable Management of Natural Resources, Responsible use of our seabed minerals and aggregates, Improve resilience to natural events.

The Ministry's Strategic Themes' Alignments are indicated in the Table below:

#### DIVISION: LEADERSHIP AND POLICY UNIT

#### <u>ST/1</u>: Economic Efficiency:

Contribute to the efficiency of the public service's delivery of goods and services through cost-effective, integrated and affordable mechanisms

**TSDF II NO A:** A MIS and dynamic knowledge-based economy.

TSDF II NO E: A MIS and successful provision and maintenance of infrastructure and technology

#### ST/5: Regulatory Framework

Contribute to the strengthening of the legal, governance and institutional mandates of Government and the public service

#### TSDF II NO F:

A MIS and effective land management, environment management and resilience to climate change and risks.

#### ST/9: Organizational Performance.

Embrace and uphold a clear mandate of the Ministry's role and responsibilities and promote continual advancements.

#### TSDF II NO: F

A more inclusive, sustainable (MIS), and effective and administration, environment management, and resilience to climate change and risk.

#### SDG 1: No Poverty

<u>**Target 1.4**</u>: ensure that all men and women, in particular the poor and the vulnerable have equal rights to resources, as well as excel to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance.

**1.4.1:** Proportion of the population living in households with access to basic services.

#### SDG 17: Partnerships

A key factor in achieving the SDG's

#### DIVISION: LAND ADMINISTRATION DIVISION

#### ST/2: Client and Stakeholder Benefits

Contribute to national economic growth and prosperity and the improvements of the standard of living of all Tongan through effective land administration on management and natural resources management.

#### ST /3: Trusted Source of Knowledge and Information

Promote the enhancement of the Ministry's reputation as a dependable and reliable service provider and as trusted and influential adviser

TSDF II NO A: A MIS dynamic knowledge based economy

**TSDF II NO B:** A MIS balanced urban and rural developments across island groups.

**TSDF II NO F:** A MIS and effective land administration, environment management, and resilience to climate change and risks.

#### SDG 15: Life On Land

(Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forest, combat desertification and halt and reverse land degradation and halt biodiversity loss).

#### SDG 2: End Hunger

Access to land and protected land tenure rights

#### DIVISION: SURVEYING SERVICES DIVISION

#### ST /3: Trusted Source of Knowledge and Information

Promote the enhancement of the Ministry's reputation as a dependable and reliable service provider and as trusted and influential adviser

#### TSDF II NO E:

A MIS and successful provision and maintenance of infrastructure and technology.

**TSDF II NO F**: A MIS and effective land administration, environment management, and resilience to climate change and risks.

#### ST/4: Sustainable Business

Strengthen the Ministry's position as a sustainable and valued organization within the Government structure and the public service.

#### TSDF II NO F:

A MIS and effective land administration, environment management, and resilience to climate change and risks.

#### SDG 15: Life On Land

(Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forest, combat desertification and halt and reverse land degradation and halt biodiversity loss).

#### DIVISION: NATURAL RESOURCES DIVISION

#### ST/6: Sustainable Management of Natural Resources

Strengthen the measures and mechanisms that ensure the sustainable utilization and management of Tonga's natural Resources

**TSDF II NO F**: A more inclusive, sustainable (MIS), and effective and administration, environment management, and resilience to climate change and risk.

#### SDG 6: Clean Water and Sanitation

Ensure available and sustainable management of water and sanitation for all.

#### Target 6.1:

By 2030, achieve universal and equitable access to safe and affordable drinking water for all

6.1.1: Percentage of population using safely managed drinking water services

**<u>Target 6.2</u>**: By 2020, Achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying.

**<u>6.2.1:</u>** Percentage of population using safely managed sanitation services, including a hand-washing facility with soap and water.

#### Target 6.3:

By 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally

6.3.2: Percentage of bodies of water with a good ambient water quality.

Target 6.4:

By 2030, substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity.

**<u>6.4.1:</u>** Percentage of total available water resources used, talking environmental water requirements into

#### Account (level)

**Target 6.a:** By 2030, expand international cooperation and capacity building support to developing countries in water and sanitation – related activities and programs, including water harvesting, desalination, water efficiency, wastewater treatment, recycling and reuse technologies. **6.a.1:** 

Amount of water – and sanitation – related official development assistance that is part of a government coordinated spending plan.

**Target 6.b:** Support and strengthen the participation of local communities in improving water and sanitation management.

**<u>6. b.1:</u>** Percentage of local administrative units with established and operational policies and procedures for participation of local communities improving water and sanitation management.

#### SDG 14: Life Below Water

(conserve and sustainably use the oceans, seas and marine resources for sustainable development) <u>14.a:</u> Increase scientific knowledge, develop research capacity and transfer marine technology, taking into account the Intergovernmental

Oceanographic Commission /Criteria and Guidelines on the Transfer of Marine Technology, in order to improve ocean health and to enhance the contribution of marine biodiversity to the development of developing countries, in particular small island developing States and least developed countries.

**<u>14. a.1:</u>** Budget allocation to research in the fields of marine technology as a percentage of total budget for research.

#### SDG 15: Life On Land

(Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forest, combat desertification and halt and reverse land degradation and halt biodiversity loss).

#### ST/7: Responsible use of our seabed minerals and aggregates

Ensure a responsible resource sector that is a valued and valuable contributor to Tonga's social and economic development.

#### TSDF II, NO: F:

A MIS and effective land administration, environment management, and resilience to climate change and risks.

#### ST / 8: Improve Resilience to Natural Events

Supporting national, district and village capabilities and actions for disaster resilience and disaster risk management.

#### TSDF II, NO: F:

A MIS and effective land administration, environment management, and resilience to climate change and risks.

#### SDG 11: Sustainable Cities and Communities

(make cities and human settlements inclusive, safe, resilient and sustainable)

#### SDG 13: Climate Action

(Take urgent action to combat climate change and its impacts)

**DIVISION: LANDS & GEOGRAPHICAL INFORMATION SYSTEM** 

#### ST/3: Trusted Source of Knowledge and Information

Promote the enhancement of the Ministry's reputation as a dependable and reliable service provider and as trusted and influential adviser

#### TSDF II NO E:

A MIS and successful provision and maintenance of infrastructure and technology. <u>TSDF II NO F</u>: A MIS and effective land administration, environment management, and resilience to climate change and risks

#### SDG 15: Life On Land

(Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forest, combat desertification and halt and reverse land degradation and halt biodiversity loss).

#### DIVISION: NATIONAL SPATIAL PLANNING AUTHORITY OFFICE

#### ST/1: Economic Efficiency

TSDF NO. A: A MIS and dynamic knowledge-based economy

**TSDF II NO. B:** A MIS and balanced urban and rural developments across island groups

**TSDF II NO. E:** A MIS and successful provision and maintenance of infrastructure and technology.

**TSDF II NO F**: A MIS and effective land administration, environment management, and resilience to climate change and risks

#### SDG 11: Sustainable Cities and Communities

(make cities and human settlements inclusive, safe, resilient and sustainable

**11.1.1:** Proportion of urban population living in slums, informal settlements or inadequate housing

**<u>11.b.1</u>**: Percentage of urban settlements that are implementing risk reduction and resilience strategies aligned with accepted international frameworks (such as the successor to the Hyogo Framework for

Action 2005-2015 on disaster risk reduction) that include vulnerable and marginalized groups in their design, implementation and monitoring.

ST/2: Client and Stakeholder Benefits

ST/3: Trusted Source of Knowledge and Information

T/4: Sustainable Business

ST/5: Regulatory Framework

ST/6: Sustainable Management of Natural Resources

SDG 6: Clean Water and Sanitation

(Ensure available and sustainable management of water and sanitation for all.

ST/8: Improve resilience to natural events

SDG 13: Climate Action

(Take urgent action to combat climate change and its impacts)

#### Tonga Strategic Development Framework II (2015-2025)

The TSDF II is the platform that directs the Ministry's activities and outputs. Government has placed commitment through the Budget Strategy 2019/2020 on Priority #9 (Land and Administration Reform) to expedite the momentum of the reform initiatives. Additional support through donor-funded technical assistance and financing will complement Government's priority setting.

#### TSDF National Outcomes significantly supported by MLNR

The Ministry significantly contributes to two (2), out of the seven (7) National Outcomes.

- A : A MIS and dynamic knowledge-based economy.
- B : A MIS and balanced urban and rural developments across island groups
- **E** : A MIS and successful provision and maintenance of infrastructure and technology
- **F** : A more inclusive, sustainable and effective land administration, environment management, and resilience to climate change and risks.

In its last CP, the Ministry focused its organizational input on Natural Resources and the Environment. This CP recognizes the critical role of infrastructure and technology inputs as a means of enhancing the capacity and capability of the Ministry. As a result, there are a number of key reforms that derive from this input.

#### TSDF Organizational Outcomes supported by MLNR

The Ministry particularly supports the following Organizational Outcomes/ OO which are considerably relevant to its charges.

#### OO 1.2: Closer public/private partnership for economic growth.

Closer, more effective public / private partnerships with business, consumers and other community groups across the Kingdom to better identify and address constraints to more inclusive, sustainable and resilient economic growth.

# OO 4.3: More reliable, safe and affordable information and communication technology (ICT) used in more innovative ways

More reliable, safe and affordable information and communication technology (ICT) used in more innovative and inclusive ways, linking people across the Kingdom and with the rest of the world, key services by government and business and drawing communities more closely together.

#### OO 4.5: Improved use of research and development focusing on priority needs

Improved use of relevant research and development that focuses on our priority needs drawing on improved foresight, helping to solve technical and other constraints to facilitate more rapid improvements to our institutions and better use of our resourced and environment so that we may progress more rapidly and be more resilient in face of future risks.

#### OO 5.1: Improved land use Planning and Management for Private and Public Spaces

Improved land use planning, management and administration with stronger and appropriate enforcement which ensures the provision of public spaces as well as private spaces, ensures more appropriate placement of infrastructure, better protects the environment, and risk, so as to improve safety conditions both for communities and businesses, working in harmony with a better application of the traditional land management system.

#### OO 5.2: Improved use of natural resources for long term flow of benefits

Improved national and community resilience to the potential disruption and damage to wellbeing, growth and development from extreme natural events and climate change, including extreme weather, climate and ocean events, with a particular focus on the likely increase in such events with climate change.

#### OO 5.4: Improved resilience to natural disasters and impact of climate change

Improved national and community resilience to the potential disruption and damage to wellbeing, growth and development from extreme natural events and climate change, including extreme weather, climate and ocean events, with a particular focus on the likely increase in such events with climate change.

#### Sector Plans, Regional & Community Development

As per the Government Priority Agenda 2018-2021, there are four (4) proposed Government Priority Areas:

- 1. Priority Sectors for Policy Development (Agriculture, Fisheries, Tourism)
- 2. **Priority Sectors for Government Investment** (Economic and Social Public Infrastructure)
- 3. **Cross-Cutting Sectors** (Good Governance, Climate Change and Disaster Recovery, Energy Efficiency, Unemployment, Trade and Law, Order and Security.
- 4. **Resource Mobilization** (Strengthen Revenue Collection, Increase Revenue Base, Development Assistance)

The table below links the priority areas in the Government Priority Agenda 2018-21 as follows:

Area of Priority	Proposed Priority	Policy and Planning Intervention	How do outputs

# **BUDGET STRATEGY 2019/2020 – 2021/2022**

The 2019/2020 Budget Strategy and Government's Priority No. 9: Land Administration and Management Reform

#### 1. PRIORITY 1

1.1 Cabinet Committee for Maritime Boundaries Delimitation Issues Including the Extended Continental Shelf - **\$1 million** 

This committee is chaired by the Hon. Minister for Lands and Natural Resources. The Natural Resources Division's work-plan describes the extensive list of activities that are scheduled by the Committee for implementation which includes bilateral negotiations and regulations for maritime boundaries and deep-sea mining

#### 1.2 Government Contribution to Implementation of Development Projects - \$1 million

MLNR is an implementing agency for several new projects commencing in the 2019/2020 FY – Transport Project Development Facility (Fanga'uta Lagoon Crossing Bridge and Nuku'alofa Port/Wharf), Tonga Integrated Urban Resilience Sector Project, and the Strengthening of Geospatial Information Management in Tonga. MLNR's implementation commitments include implementation of activities (public consultation, facilitation and compensation for land acquisition, support for technical assistance and travel).

1.3 New building and facilities - \$3 million

The Ministry is located at 2 separate locations with the head office and four divisions located at the Nuku'alofa CBD. The Natural Resources Division is located separately at Vaololoa. The head office operations and divisions are located in 6 separate buildings severely compromising procedural workflow and support systems. Further, the conditions of the buildings are deteriorated and are in an extreme state of disrepair to the extent that the occupational health and safety of the personnel are at risk. The deteriorated buildings cannot support ICT infrastructure and is not conducive to further investment in ICT equipment and accessories.

The recent Tropical Cyclone Gita caused major damage to the head office premises and renovation cost has been estimated at TOP 1.5 million. The Ministry takes the view that it would be far more cost effective to invest in a new, fit for purpose and functional office building and premises. The benefits of this initiative are: Firstly, it will support the workflow and systems of the Ministry, as well as boost the morale of the personnel by providing a healthy work environment. This in turn, will enhance productivity of the Ministry. Secondly, the Ministry's document storage facilities are highly inadequate in Nuku'alofa (known as "Strong Room") that stores majority of all of Tonga's original hard copy land records of the past 135 years. These are priceless land land records and historical documents that should be housed separately (inclusive in proposed budget) In very strict environmental control conditions to ensure the survival for future generations. Thirdly, and of equal importance, the Ministry's customer service will be greatly enhanced with proper facilities for serving those customers that attend at the Ministry for a range of services and products.

The Ministry views this initiative as critical to the achievement of its vision and mission particularly with the workflow of the Ministry's assignments.

1.4 Implementation of Open Solutions for Land Administration software (including the activities and recommendations under the ILAMS Project: SOLA Applications Development Exit Report) - **\$200,000** 

This Report developed 11 new Standard Operating Procedures (SOPs) to improve a number of essential services and products delivered by the Ministry. The implementation of these SOPs requires additional personnel and new equipment.

- 1.5 Strengthening of the Natural Resources Division to enable the full functioning of the coastal management section and water resources management section including the National Flood Management Master Plan and National Hydrology Strategy **\$500,000**
- 1.6 Administration of the National Spatial Planning Authority and Urban Planning and Management Agency (PUMA) -\$500,000

The National Spatial Planning and Management Act 2012 has been brought into force and requires additional personnel to administer and implement the Act. The Minister for Lands is the National Spatial Planning Authority supported by PUMA. The Act activates the spatial planning and development consent procedural and decision-making mechanisms.

#### 2. PRIORITY 2

- 2.1 Drafting and administration of new legislation (Water Resources Management Bill, Oceans Planning and Management Bill and Surveying Bill) \$200,000 This suite of legislation is critical to sustainable resource management and the delivery of efficient and professional services and products by the Ministry.
- 2.2 Maintenance of technical facilities (national seismic stations and Continuously Operating Reference Station) **\$200,000**

These facilities (which are severely deteriorated and not operational) are essential for providing accurate and timely information and data for early warning systems, disaster risk reduction and climate and oceanic monitoring.

2.3 Meeting obligations for international and regional commitments as are necessary to the functions and responsibilities of the MLNR (including duties as Chair and Executive Council members of various organizations) - **\$200,000** 

These commitments are important for the Ministry's engagement on behalf of the Government with international and regional partners. This enhances the Government's collaboration and commitment its international obligations and is a mechanism for securing funding and technical assistance and capacity building.

#### 2) Administration of the National Spatial Planning Authority and Urban Planning and Management Agency (PUMA)

The National Spatial Planning and Management Act 2012 has been brought into force and requires additional personnel to administer and implement the Act. The Minister for Lands is the National Spatial Planning Authority supported by PUMA. The Act activates the spatial planning and development consent procedural and decision-making mechanisms. - \$500,000

TOTAL BUDGET PROPOSAL: \$4,800,000.00

# MINISTRY OVERVIEW

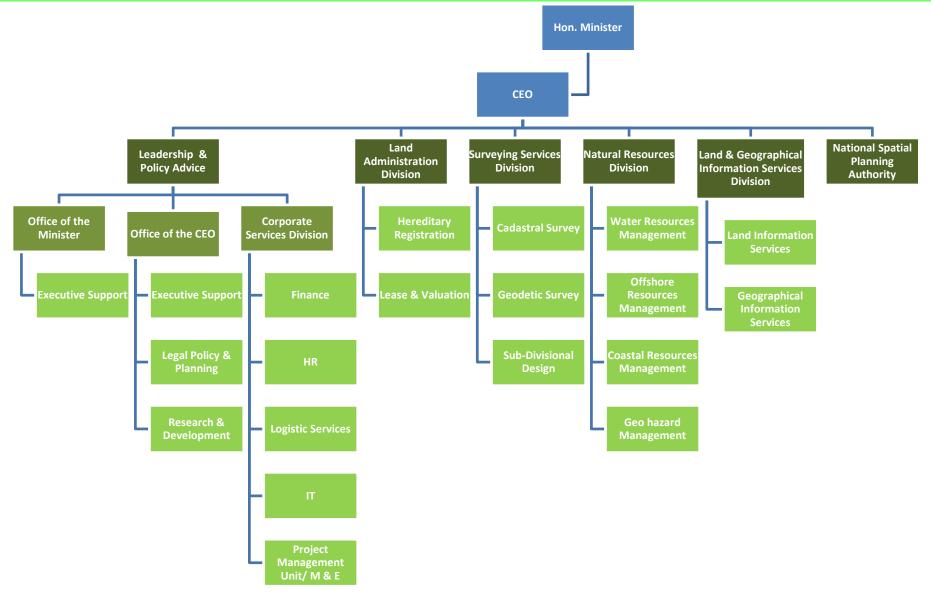

Ministry Outputs grouped into Divisions/Sub-Programs and Programs

Programs	Sub-Programs	Strategic Themes (ST)	Ministry's External Outputs	Activities/Strategies	Responsible Division
	<b>01:</b> Office of the Minister	ST/ 9: Organizational Performance ST/ 1: Economic Efficiency ST/4: Sustainable Business ST /5: Regulatory Framework	Leadership through the lawful exercise of powers and duties conferred by the Constitution and Statutory Instruments.	Administration of Ministry of Land and Natural Resources Portfolio Leadership	Minister, CEO
	02: Office of the CEO	As above	Leadership through lawful exercise of powers and duties conferred under the Public Service Act and regulations, Public Finance Management Act and regulations and in accordance with the CEO's contract of employment signed with the Public Service Commission.	Managing and executing of the duties of the CEO that are related to strategic directives, high level public official and private sector executive contacts and communications.	CEO, CSD
	<b>03:</b> Corporate Services Division	As above	Internal Outputs	Better managed Divisions, with good working relations, meeting deadlines for the delivery of their outputs to an acceptable standard	CEO, CSD
Program 2: Land Administration Services	<b>01:</b> Land Administration Division	<b>ST/2:</b> Client and Stakeholder Benefits <b>ST/3:</b> Trusted Source of Knowledge and Information	Manage land tenure, land value, land use and land development through a range of systems & procedures		<b>Deputy Secretary -</b> Registration and Hereditary Unit, Lease and Valuation Unit

Program 3: 01: Cad Surveying Services	<b>01:</b> Cadastral Survey	<ul><li>ST/3: Trusted Source of Knowledge and Information</li><li>ST/4: Sustainable Business</li></ul>	Efficient & effective system of survey, mapping and sub- divisional design of land in Tonga. to facilitate social and economic development based on global, updated and accurate geodetic infrastructure	<b>Deputy/ Secretary - LID</b> Cadastral Surveying Unit, Geodesy Unit, Sub- Divisional and Design.
	<b>02:</b> Geodetic Survey	As above	Maintaining and densifying a network of accurate survey control points for Tonga.	As above
	<b>03:</b> Sub- Division and Design	As above	Efficient sub-Division of land into allotments	As above
Program 4: Natural Resources Management	<b>01:</b> Natural Resources Division	ST/6: Sustainable management of Natural Resources ST/7: Responsible Use of our Seabed minerals and aggregates ST/8: Improve resilience to natural events	Sustainable management of natural resources, effective advice of natural hazards to stakeholders, strengthen resilience to climate change & impacts	<b>Deputy / Secretary -</b> Water Resources Unit, Coastal Mapping Unit, Off-Shore Unit, Geo- Hazards Unit.

<b>Program 5:</b> Land and Geographical Information Systems	<b>01:</b> Land Information Systems	<b>ST/3:</b> Trusted Source of Knowledge and Information	Support the effective use of national geospatial and mapping information, systems and capabilities for evidence-based policy and decision-making.		<b>Deputy / Secretary - LID</b> Land Information Systems, Geographic Information System
	<b>02:</b> Geographical Information Services		Provide geospatial information to maximize sustainable decision making upon land and marine resources		As above
Program 6: Planning and Urban Management Agency (PUMA)	01. Planning and Standards 02. Evaluation / Enforcement	ST/2: Economic Efficiency ST/3: Client and Stakeholder Benefits, ST/4: Trusted Source of Knowledge and Information, ST/5: Sustainable	A Spatial Planning System that better manages the use, development and protection of land in the Kingdom in the public interest and for related purposes	Administer and manage the preparation and maintenance of sustainable spatial plans which may relate to national, regional, district, village or site specific areas.	Director
	03. Technical Support 04. Adjudication	ST/6: Regulatory Framework, ST/7: Sustainable Management of Natural			
	<ul><li>05. Secretariat / Policy</li><li>06. Projects Management</li></ul>	Resources, <b>ST/9</b> : Improve resilience to natural events.			

# **MINISTRY ORGANIZATIONAL STRUCTURE**

# SUMMARY OF MDA PLANNED MAJOR REFORMS

#### Leadership and Policy

A major reform for this CP is the strengthening of the Policy, Planning and Legal function of the Ministry through the establishment of a 2 new sections, Planning and Development and Legal and Policy. This is to ensure that the Office of the CEO has the capacity to properly oversight and drive the strategic vision of the Ministry. Areas of focus will include –

- 1. The oversight by the CEO of Government projects that the Ministry has an implementation role. In addition to existing development projects in which the Ministry is an implementing agency Pacific Resilience Program (PREP), Climate Resilience Sector Project (CRSP) and Nuku'alofa Urban Development Sector Project (NUDSP), most development projects involve a land-related component requiring assistance from the Ministry. There are new projects to be implemented in this FY. The Ministry will be actively involved in the Transport Project Development Facility (Fanga'uta Lagoon Crossing Bridge and Nuku'alofa Ports), Tonga Integrated Urban Resilience Sector Project, and the Strengthening of Geospatial Information Management in Tonga. These are all new projects which will require funding to enable the Ministry to meet its implementation obligations including funding specific activities and land acquisition requirements for the projects.
- 2. Strengthening the policy framework for land and natural resource management. This includes finalising and endorsement of the Draft National Land Use Policy as well as completing the internal Briefing Paper: Policy Issues under the Land Act.

#### New Office Building and Facilities: Tropical Cyclone Gita (Response and Recovery)

The Ministry is located at 2 separate locations with the head office and four divisions located at the Nuku'alofa CBD. The Natural Resources Division is located separately at Vaololoa. The head office operations and divisions are located in 6 separate buildings severely compromising procedural workflow and support systems. Further, the conditions of the buildings are deteriorated and are in an extreme state of disrepair and infested with rodents and pests to the extent that the occupational health and safety of the personnel as well as the records/files are at risk. The deteriorated buildings cannot support ICT infrastructure and is not conducive to further investment in ICT equipment and accessories.

The recent Tropical Cyclone Gita caused major damage to the head office premises and renovation cost has been estimated at TOP 1.5 million. The ministry takes the view that it would far more cost effective to invest in a new, fit for purpose and functional office building and premises. The benefits of this initiative are two-fold. Firstly, it will support the workflow and systems of the Ministry, as well as boost the morale of the personnel by providing a healthy work environment. This in turn, will enhance productivity of the Ministry. Secondly, and of equal importance, the Ministry's customer service will be greatly enhanced with proper facilities for serving those customers that attend at the Ministry for a range of services and products.

The Ministry views this initiative as critical to the achievement of its vision and mission particularly with the workflow of the Ministry's assignments.

#### Integration of Land Information Systems

The splitting of the Ministry's functions into 2 new divisions – Surveying and Land and Geographical Information Systems recognizes the need to separate the functions of the surveying services and GIS/cadastral mapping so that each may focus on specific outputs / activities that are fundamental to the building blocks of Tonga's land management system. The GIS and cadastral mapping are integrated under a new division with a view to streamlining the land information functions of the Ministry and to focus primarily on the design, development and updating of land parcels. To ensure that the two divisions' interoperability is

established and maintained, the Ministry will procure computer software that is functional for all sections in both divisions and can inter-phase with the GIS' Arch -GIS and SOLA software packages.

#### Investing in ICT to enhance land administration services

Within the wider context of the E-Government and ICT initiative, the Ministry is committed to investing in ICT to support the shift of the land administration services from manual-based to a computerized system. The Ministry had already embarked on a program of incremental computerization of the land administration services in the last 5 years. However, progress has been protracted. In that time, the Ministry has fully recognized the important role of ICT to land administration as supporting greater access to and sharing of information, improve data quality and completeness, increase security and transparency of operations and information, increase revenue generation around more efficient services and new services and products, as well as providing a tool for monitoring and evaluation of the Ministry's effectiveness. The Ministry will accelerate the implementation and extension of SOLA within the technical and financial support of the FAO ILAMS project. SOLA incorporates best practices and standards of land administration and provides an affordable, sustainable, fit for purpose computerized cadaster and land registration system.

At present, this project is being implemented in an ad hoc manner and there is a need to consolidate this project under one Division for project management and implementation purposes.

#### **Strengthen Policy and Planning Capacity**

There are deficiencies with the Ministry's policy and planning capacity with these responsibilities spread on an ad hoc basis across all the divisions. There is a need to consolidate the policy and planning functions under the office of the CEO to ensure coordination and collaboration and a holistic approach. This is to enable the Ministry to more effectively engage with key stakeholders in contributing to development project implementation and to allow for meaningful participation to the policy initiatives of Government. This requires engagement of additional staff and resources.

#### Strengthen Legislative Framework

There is a range of legislation and regulations required to enhance some of the core functions of the Ministry (surveying services, GIS, ICT support, oceans management and planning and natural resources management). Draft legislative instruments have been proposed and the Ministry is planning ahead for the administration of these legislations. Additionally, there are gaps in existing legislation that should be reviewed taking into consideration the recommendations of the Royal Land Commission reports, as well as a raft of regulations to administer the Land Act. There is also a need to enhance the Ministry's ability to enforce its compliance and enforcement measures – in both the lands and natural resources mandate. Again, these functions need to be centralized under the Office of the CEO to ensure a holistic approach.

# **MLNR BUDGET AND STAFFING**

To deliver the MDA Outputs to the standards set out for each division/sub-program the overall budget, summarized in Table 1 and staff, summarized in Table 2 are required (all tables to be completed for Final CP):

Table 2: Ministry Budget by Recurrent, Development and item (cash & in-kind – millions)

Expenditure Item (\$m)	2016/17	2018/19	2018/19	2019/20	2020/21	2021/22

# MLNR PROGRAMS AND SUB-PROGRAMS

## **PROGRAM 1: LEADERSHIP AND POLICY ADVICE**

This division's responsibilities are to support the agendas of Government through high quality policy advice and effective implementation of key government programs, to provide leadership and coordination for the Ministry and to oversee the management and administration of the Ministry's land and natural resources mandate.

#### Office of the Hon. Minister

The Ministry supports the Hon. Minister of Lands, and Natural Resources in exercising his powers within the Constitution and the law. The Hon. Minister is the representative of the Crown in all land matters and holds concurrently the functions of the Registrar General and Surveyor General. Pursuant to other Acts, he is also conferred with the powers of the following statutory offices:

- 1. National Spatial Planning Authority
- 2. Seabed Minerals Authority
- 3. Parks and Reserves Authority
- 4. Roads Authority

#### Office of the Chief Executive Officer

The Office of the CEO is responsible for managing and executing the duties of the CEO that are related to strategic directives, high level public official and private sector executive contacts and communications. This involves process implementation, senior executive assignments, national and international public events, and ensuring that the Ministry as a whole deliver against deadlines ensuring the highest quality of work is delivered. These responsibilities include preparation and review of the Ministry's communication and correspondences, management of the CEO's agenda and office matters, management of external and internal events, visits and meetings, following up on strategic projects with teams to ensure completion on time and to the required standard of quality, and ensuring that the Ministry complies with internal policies and procedures.

The Office of the CEO requires professional and qualified legal, policy and planning expertise.

The CEO is conferred with authority and duties under the Public Service Act and regulations, Public Finance Management Act and regulations and in accordance with the CEO's contract of employment signed with the Public Service Commission including;

- 1. Providing the Minister with high quality policy and program development advice.
- 2. Driving strategic planning and resource management accountabilities
- 3. Providing executive direction to professional, technical and operational teams.
- 4. Identifying improvements in service delivery and cost effectiveness to government
- 5. Leading implementation of organizational and systematic changes to improve productivity
- 6. Modeling Cross-Ministry and whole of government collaboration to ensure high standards of communication

#### SURVEY SERVICES DIVISION

This division provides professional advice on and technical support to most categories of surveys. Professional surveying refers to the application of knowledge of the science of surveying measurement, the legal principles of boundary location, the laws related to boundaries and land use, the applicable mathematical and computational theories and principles, the natural and other forces which affect positional accuracy, the land planning and development concepts pertinent to sub division of land and property surveys, land record and land tenure concepts, geodetic and other earth-related sciences to the analyses, design, and execution of surveying and mapping projects and the design of land mapping and information systems.

#### Output 3: Surveying Services

Land boundaries and allotments are accurately demarcated and physically delineated

### NATURAL RESOURCES DIVISION

This Division contributes to the promotion of a diverse economy by stimulating economic growth through the responsible use of our natural resources—water, ocean, land, minerals and aggregates. The Division also supports the protection of the environment by ensuring sustainable management of our natural resources and by supporting responsible development. The Division is committed to delivering quality frontline services by providing responsive and integrated services.

#### **Output 6: Natural Resources Division** Sustainable management of Natural Resources, effective advice of natural hazards to stakeholders, strengthen SDGs/TSDF resilience to climate change & impacts. ## Annex 2: Sustainable Development Goals and Targets Relevant to the Ministry of Lands and Natural Resources

Sustainable Development Goals	
Sustainable Development Goals	
Goal 1 : No Poverty	
<b>Target 1.4:</b> Ensure that all men and women, in particular the poor and the vulnerable have equal rights to resources, as well as excess to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including micro finance.	<b>1.4.1:</b> Proportion of the population living in households with access to basic services.
Goal 6: Clean Water and	Indicators
Sanitation	
Ensure availability and sustainable management of water and sanitation for all	
<b>6.1:</b> By 2030, achieve universal and equitable access to safe and affordable drinking water for all	<b>6.1.1:</b> Percentage of population using safely managed drinking water services
<b>6.2</b> :: By 2020 , achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying	<b>6.2.1:</b> Percentage of population using safely managed sanitation services, including a hand-washing facility with soap and water.
<b>6.3:</b> By 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally.	<b>6.3.2:</b> Percentage of bodies of water with a good ambient water quality.
<b>6.4:</b> By 2030, substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity	<ul> <li>6.4.1: Percentage change in water use efficiency over time.</li> <li>6.4.2: Percentage of total available water resources used, talking environmental water requirements into account (level)</li> </ul>

<b>6.a:</b> By 2030, expand international cooperation and capacity building support to developing countries in water-and sanitation – related activities and programs, including water harvesting, desalination, water efficiency, wastewater treatment, recycling and reuse technologies.	<b>6.a.1:</b> Amount of water – and sanitation – related official development assistance that is part of a government coordinated spending plan.
<b>6.b:</b> Support and strengthen the participation of local communities in improving water and sanitation management.	<b>6.b.1:</b> Percentage of local administrative units with established and operational policies and procedures for participation of local communities in improving water and sanitation management.
Goal 11: Sustainable Cities and	Indicators
CommunitiesMake cities and human settlementsinclusive, safe, resilient andsustainable11.1: By 2030, ensure access for all	<b>11.1.1:</b> Proportion of urban population living in slums, informal
to adequate , safe and affordable housing and basic services and upgrade slums <b>11.2:</b> By 2030, provide access to	settlements or inadequate housing.
safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, and children, persons with disabilities and older persons.	<b>11.2.1:</b> Proportion of the population that has convenient access to public transport, disaggregated by age group, sex and persons with disabilities.
<b>11.3:</b> By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries.	<b>11.3.1:</b> Percentage of cities with a direct participation structure of civil society in urban planning and management which operate regularly and democratically.
<b>11.4:</b> Strengthen efforts to protect and safeguard the world's cultural and natural heritage.	<b>11.4.1:</b> Share of national (or municipal) budget which is dedicated to the preservation, protection and conservation of national cultural natural heritage, including World heritage sites
<b>11.5:</b> By 2030, significantly reduce the number of deaths and the number of people affected and substantially decrease the direct economic losses relative to global gross domestic product caused by disasters, including water –related disasters, with a focus on protecting	<ul> <li>11.5.1: Number of deaths, missing people, injured, relocated or evacuated due to disasters per 100,000 people.</li> <li>11.5.2: Direct economic loss in relation to global GDP, damage to critical infrastructure and number of disruption to basic services, attributed to disasters.</li> </ul>

the poor and people in vulnerable situations.	
<b>11.6:</b> By 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management.	<b>11.6.1:</b> Percentage of urban solid waste regularly collected and with adequate final discharge with regards to the total waste generated by the city.
<b>11.7:</b> By 2030, provide universal access to safe, inclusive and accessible, green and public spaces, in particular for women and children, older persons and persons	<ul> <li><b>11.7.1:</b> The average share of the built up area of cities that is open space for public use for all, disaggregated by age group, sex and persons with disabilities.</li> <li><b>11.7.2:</b> Proportion of women subjected to physical and sexual</li> </ul>
with disabilities.	harassment, by perpetrator and place of occurrence.
<b>11.b:</b> By 2030, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigating and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, holistic disaster risk management.	<b>11.b.1:</b> Percentage of cities that are implementing risk reduction and resilience strategies aligned with accepted international frameworks (such as the successor to the Hyogo Framework for Action 2005-2015 on disaster risk reduction) that include vulnerable and marginalized groups in their design, implementation and monitoring.
<b>11.c:</b> Support least developed countries, including through financial and technical assistance, in building sustainable and resilient buildings utilizing local materials	<b>11.c.1:</b> Percentage of financial support that is allocated to the construction and retrofitting of sustainable, resilient and resource-efficient buildings.
Goal 13: Climate Action	Indicators
Take urgent action to combat climate change and its impacts <b>13.1:</b> Strengthen resilience and	<ul> <li>13.1.1: Number of deaths, missing people, injured, relocated or evacuated due to disasters per 100,000 people.</li> <li>13.1.2: Number of countries that adopt and implement patienal disaster.</li> </ul>
adaptive capacity to climate-related hazards and natural disasters in all countries	<b>13.1.2:</b> Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction.
<b>13.2:</b> Integrate climate change measures into national policies, strategies and planning	<b>13.2.1</b> : Number of countries that have formally communicated the establishment of integrated low-carbon, climate resilient, disaster risk reduction development strategies (e.g. A national adaptation plan

	process, national policies and measures to promote the transition to environmentally friendly substances and technologies).
<b>13.3:</b> Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning.	<b>13.3.1:</b> Number of countries that have integrated mitigation, adaptation, impact reduction and early warning into primary, secondary and tertiary curricula.
<b>13.b:</b> Promote mechanisms for raising capacity for effective climate change-related planning and management in least developed countries and small island developing States, including focusing on women, youth and local and marginalized communities.	<b>13.b.1:</b> Number of least developed countries and small island developing states that are receiving specialized support for mechanisms for raising capacities for effective climate change-related planning and management, including focusing on women, youth, local and marginalized communities.
Goal 14: Life Below Water	Indicators
Conserve and sustainably use the oceans, seas and marine resources for sustainable development. <b>14.1:</b> By 2025, prevent and significantly reduce marine pollution of all kinds, in particular from landbased activities, including marine debris and nutrient pollution.	<b>14.1.1:</b> Index of coastal eutrophication and floating plastic debris density.
<b>14.2</b> : By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive oceans.	<b>14.2.1</b> : Progress by countries in the degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing.
<b>14.3:</b> Minimize and address the impacts of ocean acidification, including through enhanced scientific corporation at all levels.	<b>14.3.1:</b> Average marine acidity (pH) measured at agreed suite of representative sampling stations.
<b>14.4:</b> By 2020, effectively regulate harvesting and end overfishing, illegal, unreported and unregulated fishing and destructive fishing practices and implement science-based management plans, in order to restore fish stocks in the shortest time feasible, at least to levels that can produce maximum sustainable yield as determined by their biological characteristics.	<b>14.4.1:</b> Proportion of fish stocks within biologically sustainable levels.

<b>14.5:</b> By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information	<b>14.5.1:</b> Coverage of protected areas in relation to marine areas.
<b>14.6:</b> By 2020, prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing, eliminate subsidies that contributed to illegal, unreported and unregulated fishing and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the WTO fisheries subsidies negotiation.	<b>14.6.1:</b> Progress by countries in the degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing.
<b>14.7:</b> By 2030, increase the economic benefits to small island developing states and least developed countries from the sustainable use of marine resources, including through sustainable management of fisheries, aquaculture and tourism.	<b>14.7.1:</b> Fisheries as a percentage of GDP
<b>14.a:</b> Increase scientific knowledge, develop research capacity and transfer marine technology, taking into account the Intergovernmental Oceanographic Commission /Criteria and Guidelines on the Transfer of Marine Technology, in order to improve ocean health and to enhance the contribution of marine biodiversity to the development of developing countries, in particular small island developing States and least developed countries.	<b>14.a.1:</b> Budget allocation to research in the field of marine technology as a percentage of total budget for research.
<b>14.b:</b> Provide access for small – scale artisanal fisheries to marine resources and markets.	<b>14.b.1:</b> Progress by countries in the degree of application of a legal / regulatory / policy/institutional framework.

Goal 15: Life on Land	Indicators
Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss)	
<b>15.1:</b> By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements.	<b>15.1.1:</b> Forest areas as a percentage of total land areas
<b>15.3:</b> By 2030, combat desertification, restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land degradation – neutral world.	<b>15.3.1:</b> Percentage of land that is degraded over total land area
<b>15.5:</b> Take urgent and significant action to reduce the degradation of natural habitats, halt the loss of biodiversity and, by 2020, protect and prevent the extinction of threatened species.	15.5.1: Red List Index
<b>15.7:</b> Take urgent action to end poaching and trafficking of protected species of flora and fauna and address both demand and supply of illegal wildlife products.	<b>15.7.1:</b> Red List Index for species in trade
<b>15.8:</b> By 2020, introduce measures to prevent the introduction and significantly reduce the impact of invasive alien species on land and water ecosystems and control or eradicate the priority species.	<b>15.8.1:</b> Proportion of countries adopting relevant national legislation and adequately resourcing the prevention or control of invasive alien species
<b>15.9:</b> By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and ac	<b>15.9.1:</b> Number of national development plans and processes integrating biodiversity and ecosystem services values
<b>15.a:</b> Mobilize and significantly increase financial resources from all sources to conserve and sustainably use biodiversity and	<b>15.a.1:</b> Official development assistance and public expenditure on conservation and sustainable use of biodiversity and ecosystems.

<b>15.b:</b> Mobilize significantly resources from all sources and at all levels to finance sustainable forest management, and provide adequate incentives to developing countries to advance sustainable forest management, including for conservation and reforestation	<b>15.b.1`:</b> Forestry official development assistance and forestry foreign direct investment
--	---
