

GOVERNMENT OF TONGA

PRESS RELEASE

(24 April, 2026)

“Update on Tonga’s Energy and Fuel Supply”

Nuku’alofa, Tonga - The public is advised that the Government has decided to remain at Level 1 (Green) under the Tonga Fuel Controls Framework, following the recommendation of Tonga’s Inter-Cluster Coordinating Committee.

This indicates that while there are early signs of fuel supply risk, overall supply remains stable.

The Government continues to encourage the public to adopt fuel-saving practices, as rising global tensions persist and continue to place pressure on fuel prices.

Fuel Supply Update

The next supply shipment by Pacific Energy for Tonga arrives this weekend. This will be followed by the Total Energies supply vessel that is scheduled to arrive next week.

The Prime Minister’s Office will host a Press Conference for further updates on Tuesday 28th April, 2026.
